Description

Smart functions:

o Safe sealing function:

Heat resistant material, expands upon contact with engine oil, acting as an extra seal to reduce the risk of oil leakage through the threads.

o Anti-vibration function:

O-Ring grips tightly into threads, virtually eliminating self-loosening of the plug caused by vibration.

o Environmentally friendly:

Significantly reduces oil leaks into the environment - motor oil is the main water pollutant in the US. It only takes four quarts, or about one oil change, of used motor oil to foul one million gallons of drinking water. The plug is safe for re-use, requiring fewer replacements.

o Thread guard:

O-Ring reduces the need for excess torquing - less risk of damaging oil pan’s threads and costly repairs. This is especially useful on vehicles with aluminum oil pans that are prone to stripping.

o Effective inventory system:

The head of each SMART-O™ plug is conveniently marked allowing users to quickly identify and manage plugs for a large number of car models. 17 sizes fit about 95% of current vehicle models; this reduces inventory costs while increasing vehicle coverage.

The Smart-O-Kit gives you everything you need to start offering your customers all the safety and protection offered by Smart-O™ for a price that is not much more than you would pay for standard drain plugs. By consolidating the plugs down to 17 sizes,

you can cover more vehicles with less inventory.

A convenient carrying case organizing the 17 different Smart-O plugs.

"A starter supply of 264 Smart-O™ drain plugs. (Quantities based on vehicle usage)

50 Each F1

40 Each F3, R1, R6

20 Each R3, R9
